

SHARP®

Simply Smarter Workplace

Elevate your workdays with smarter technology that is simple to use.

The Shift to Smarter

Smart technologies have simplified our lives at home. We speak to digital assistants and control our environments from our mobile devices. But, in general, that's not yet the office experience. Technology in the workplace should be as responsive, and Sharp can help you get there.

The universal need to share information has been challenged by the new normal and the emergence of a distributed workforce. Adopting smarter technologies can address hybrid employee needs today and continue to propel your workforce in the future.

Smarter Security

Secure company data in and out of the office

Smarter Signage

Engage employees, customers and visitors

Smarter Collaboration

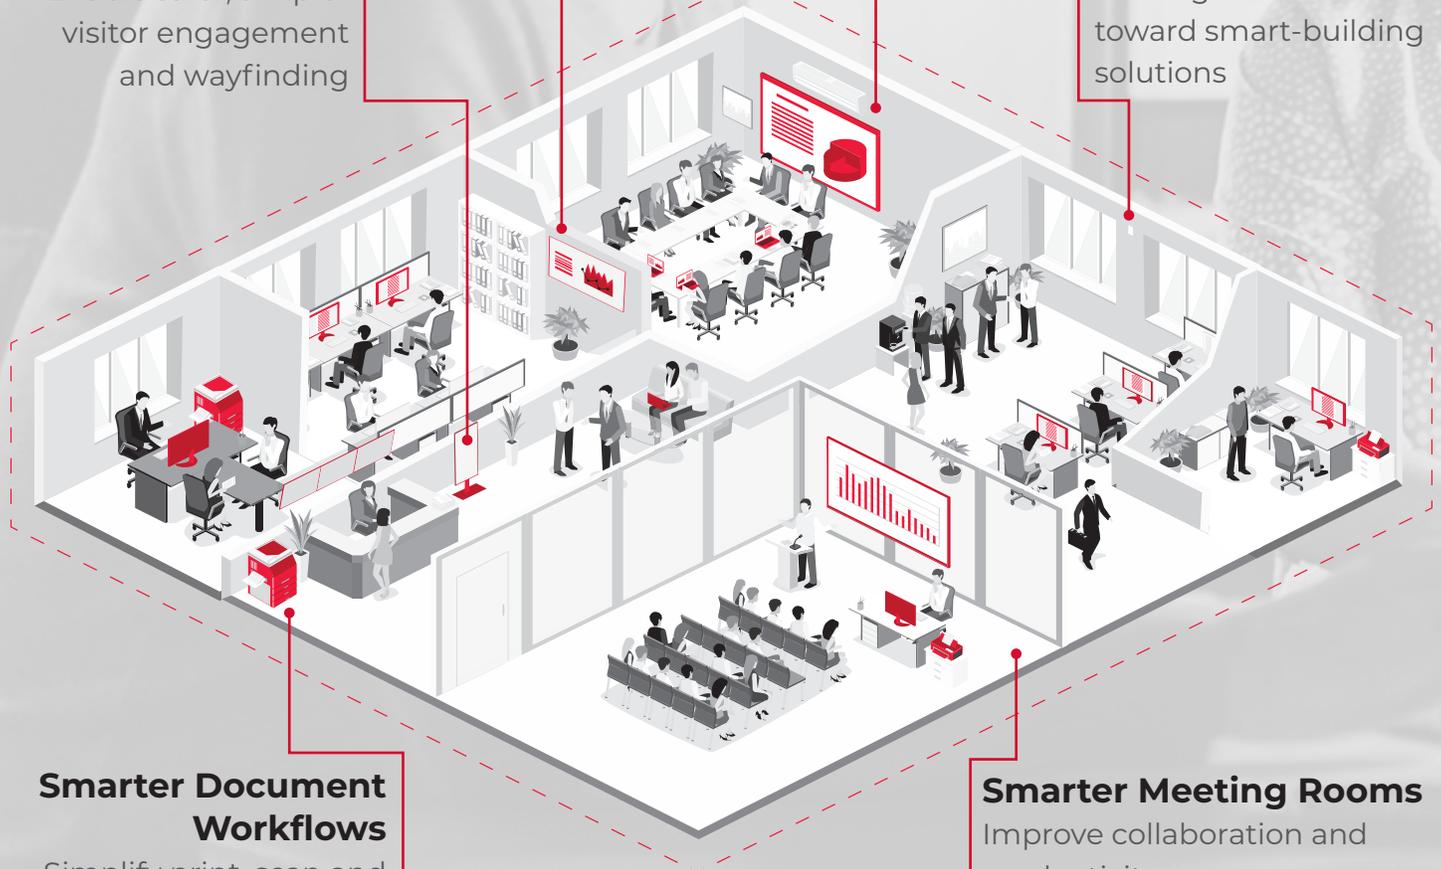

Accelerate communications between hybrid office workers during impromptu and scheduled meetings

Smarter Reception

Enable safer, simpler visitor engagement and wayfinding

Smarter Energy

Leverage IoT sensors toward smart-building solutions

Smarter Document Workflows

Simplify print, scan and copy with mobile app and voice-controlled MFPs

Smarter Meeting Rooms

Improve collaboration and productivity

Simplify the Work Experience

It starts with a plan.

Create a smart office your way by teaming up with us. We begin with an assessment to identify opportunities to promote safety, collaboration, efficiency and security. Then, we'll work together to build your ideal version of a smart workplace.

Safety

Identify methods to automate health screening and reporting, and limit staff and visitor exposure with an improved reception experience.

Collaboration

Uncover opportunities to improve the way employees communicate, conduct meetings and share information—in or away from the office.

Efficiency

Simplify the management of your copiers and printers to curb expenses; digitize paperwork to improve file access and processes.

Security

Get proactive IT support and pinpoint network vulnerabilities to help prevent unauthorized access and data loss.

Safety

Technology for a safer welcome and to help limit staff and guest exposure.

Touchless Temperature Screening

Deliver a smart, fast and reliable self-screening and check-in experience in your reception area with LivMote™.

Live, Virtual Reception

Greet guests remotely and staff key locations without having an employee on site. Leverage a brilliant, large format professional display, soundbar and high-resolution camera to provide the next best thing to face-to-face interaction.

“Touch-Free” Copiers

Limit contact with high-touch surfaces of shared office equipment. Use Amazon Alexa voice-first interaction or Synappx™ Go on a smartphone to print, copy and scan.

Touchpoint Tracking

Synappx Go offers a “Check In” feature with NFC tags to help track employee traffic in common work areas such as conference rooms and breakrooms.

Bring the Office Home

Work from anywhere with technology from Sharp. Remain productive and protected with laptops and accessories, monitors, desktop printers and optional security and remote monitoring.

Collaboration

Enhance the way you communicate using state-of-the-art technology.

Collaboration Displays

Conduct intuitive meetings on the **AQUOS BOARD® interactive display**. Share screens, send files to and from mobile devices and collaborate on the responsive touchscreen with up to four people writing at once.

The **Windows collaboration display** from Sharp (WCD) includes a built-in four-microphone array for outstanding audio, 4K camera and wireless casting. The WCD is Skype for Business certified and works seamlessly with Microsoft 365 including Teams. Plug and play using its USB-C connector to quickly display content. Synappx WorkSpaces collects data from the built-in IoT sensor to provide analytics, helping management make informed decisions to optimize meeting spaces.

Professional Displays

Communicate ever-changing information on full-HD Sharp displays, built for 24/7 commercial use and available in a wide range of sizes. What's more, video walls can make a big impact in spacious areas.

Laptops

Dynabook laptops have their own proprietary BIOS and undergo rigorous pre-production testing, including military grade tests (MIL-STD810G). They can be built to order to meet your specific requirements so you always work productively, from anywhere.

Unified Communications

Help your team connect over a unified communications platform for voice, chat, text/SMS, email, fax and video conferencing.

Digital Meeting Assistant

Synappx Meeting software connects all components needed to start a meeting with just one click and manages time with the countdown feature. It can disconnect technologies used at the end of the meeting, before you jump into your next one.

Copiers and Printers

Increase workflow efficiency whether at home or in the office with Sharp high-performance copiers and printers. Models offer exceptional image quality, integrated security and are easy to use and maintain.

Efficiency

Stay agile by simplifying your print environment and document processes.

Simplified Device Management

Need toner? Maintenance? Sharp already knows! Keep your print devices running at the level you'd expect with Machine Intelligence Call Assistance System (MICAS). MICAS, a free Sharp-engineered service application automates meter collection, service alerts and toner replenishment to increase uptime.

Control Print Usage

Shrink your printer count/footprint and costs by implementing eco-friendly printing policies to consume less paper and save on toner. Advanced print management software, such as PaperCut™, can facilitate billing, accounting, secure print release and activity tracking.

Managed Print Services

A dedicated team to manage and analyze your print environment to keep costs low, increase equipment uptime and improve efficiency. Understand your true cost of printing and receive a predictable invoice from a single vendor.

Digitized Documents and Workflow

Stop the paper chase with advanced software that digitizes paperwork, automates manual processes and manages content in one location. This solution makes it possible to increase document accessibility, decrease errors, improve compliance and speed up decision making across teams.

Increase Efficiency and Support with Managed Print Services (MPS)

MPS can reduce print spending
up to 30%¹

Pepperdine University
6 Campuses
with controlled print spending

Community Health Network
Saved \$1M¹
over a five-year span

Major City in California
50% Savings
when switching MPS providers

of small and medium sized businesses partnering with a Managed Service Provider have reduced cybersecurity risk.²

Security

IT support to oversee your infrastructure with monitoring, threat mitigation, compliance data reporting, data backup and more.

Desktop Security

From desktop remote monitoring and dark web protection to training and password management, help detect issues before a system failure arises. Email and DNS protection helps thwart advanced threats like ransomware and phishing.

Server Security

From server monitoring and spyware protection to real-time analysis of security alerts, you need a proper line of defense to help stop attacks before they hit your network.

Network Security

Using security information and event management (SIEM) technology, experts can analyze and correlate information to help identify and remediate threats like policy violations, fraudulent activity and security configuration gaps.

Help Desk Support

When a computer issue arises, certified technicians can quickly and efficiently provide support to get you up and running as fast as possible.

Security-First Copiers and Printers

Stay ahead of malicious intruders with leading-edge security features.

- Firmware attack prevention and recovery
- Whitelisting capability
- Confidential printing
- Active Directory trusted device status
- End-of-lease feature to erase data upon return
